Jade Styants
Company Secretary

About Castle Minerals Limited

Castle Minerals is listed on the Australian Stock Exchange (ASX: CDT) and headquartered in Perth, Western Australia. In addition to its interest in the Coolyia Creek and Beasley Creek conglomerate-hosted paleo-placer style gold projects in the Pilbara region of Western Australia, it has a large contiguous tenure position in the Upper West region of Ghana, West Africa, a country with a long history of gold exploration and mining. Its Ghana licence holdings encompass large tracts of highly prospective Birimian geological terrane, the host to many of West Africa’s multi-million-ounce gold mines. All of Castle’s ground in Western Australia and Ghana, whilst at a relatively early stage of exploration, presents a number of targets offering opportunities for discoveries of gold and other minerals.
